This volume contains the proceedings of the 14th Regional Conference of the German Branch of the International Nuclear Law Association (INLA) held in Nuremberg in September 2015. In five chapters, German and international experts, with contributions partly in German but predominantly in English, explain the most recent developments in nuclear law in Germany, in other countries and on the international level. The topics include: turnkey contracts in the nuclear industry; claims under EU environmental law and under ICSID arbitration; developments in legal requirements for final disposal of nuclear waste in various countries such as Germany and the US; topics of nuclear liability, such as the situation in India; and finally nuclear safety and

regulation. For anyone who wants to keep up-to-date on important developments of nuclear law, this volume is an obvious choice.
