This volume contains the proceedings of the 15th Regional Conference of the German Branch of the International Nuclear Law Association (INLA), which was held in Bonn in September 2017. In four chapters, German and international experts, whose contributions are predominantly in English and partly in German, explain the most recent developments in nuclear law in Germany, other countries and on an international level. The topics addressed include nuclear waste management – responsibility and liability; nuclear third-party liability, with a focus on the transportation of nuclear material; legal issues in radiation protection, mainly regarding EU Basic Safety Standards, plant decommissioning and

waste disposal, and current trends in international nuclear law. This volume is an obvious choice for anyone who wants to keep abreast of important developments in nuclear law.
